B1 InterCompany

Automate your document flow and achieve better control between your connected companies

SAP Business One

WHAT IS
– B1 InterCompany

Boyum IT's B1 InterCompany is the solution for facilitating smoother business transactions between parent companies and subsidiaries using SAP Business One. Simplifying communication and collaboration across your organization.

Picture this: your data, documents, and transactions flow effortlessly between SAP Business One databases, simplifying your daily operations. With B1 InterCompany, managing transactions within your company becomes easy, saving you from manual data entry headaches.

Our intercompany solution helps organizations to manage daily business transactions that impact different legal entities including operational general business flows from sales orders to purchase orders, inventory, and other master data replication across companies.

With B1 InterCompany, you're not just managing intercompany operations; you're bringing your entire organization closer together.

It's about simplifying, not complicating.

BENEFITS
— with B1 InterCompany

SIMPLIFY

Navigating intercompany transactions and coordinating integration across various business units or subsidiaries can be operationally intricate. B1 InterCompany simplifies procurement processes for greater efficiency.

REPLICATE & DISTRIBUTE

Rest assured that all subsidiaries maintain consistent master data, encompassing Inventory information, Customer and supplier details, Equipment serial numbers, Bill of Materials and personalised User Defined fields.

MITIGATE RISKS

Real-time monitoring, automated transaction flows, standardized procedures, segregation of duties, and audit trails enhance operational visibility and ensure effective traceability among your business entities.

HARMONIZE

Automating intercompany transactions in SAP Business One simplifies data entry and enhances the exchange of trade documents between different business units (e.g., purchase orders, receipts, invoices, credit memos).

CENTRALIZE MANAGEMENT

Improve database control for error prevention and centralized management. Optimize trade and master data processes to unlock better opportunities. Experience real-time operations to improve decision making.

CUSTOMER
— experience

> The B1 InterCompany solution has been a significant relief for our employees. The solution streamlines the sales process across different countries and facilitates deliveries between sister companies. Additionally, we appreciate the overall stability and reliability of B1 InterCompany, which provides a secure and dependable system for our everyday operations.
